for probate, it is learned that the bulk of the estate of Mrs. Sallie Dortch Kenan, cierk of the Supreme Court, is while in the city yesterday, reported that the cold weather of Monday and Tuesday ruineds all chances for a crop on that property this year.

Indoor Life Makes Fat

"The peach trees were very much advanced on account of the unusually warm weather which has prevailed during the first six months of the year, the advance being at such a stage that the buds were unable to survive temperature as low as it was during Sun iv and Monday nights.

While no reports have come from

People who are confined within doors and who are deprived of fresh, invigorating air and exercise must take precaution to guard against over stoutness, as fat acquired by indoor life is unhealthy and a danger to the vital organs of the body. Lack of exercise in the fresh air is said to weaken the oxygen carrying power of the blood, so that it is unable to produce strong muscles and vitality and the formation of unsightly and unhealthy fat is the result.

If you are fifteen or twenty pounds above normal weight you are daily drawing on your reserve strength and other large orchards in the counties contiguous to Lynchburg, fears are held for these, because, generally the Montross orchard on the mountain ean of unsignity and uniteritiny fat is the result.

If you are fifteen or twenty pounds above normal weight you are daily drawing on your reserve strength and are constantly lowering your vitality by carrying this excess burden. Any persons who are satisfied in their own mind that they are too stout are advised to go to Tragle Drug Co., or any good druggist and get a box of oil of korein capsules, and take one after each meal and one before retiring at night. stand more severe weather than those in the lower lands.
